BLUE UMBRELLA RECONCILIATION ACT

January 15, 2026

Umbrella Co. (Blue) officially reaffirms its unwavering commitment to the total **eradication of Bio-Organic Weapons (B.O.W.s)** on a worldwide scale. By pivoting from its origins toward a mission of global safety, the company is dedicating its vast technical resources to neutralizing biological hazards and restoring international stability.

In a significant partnership with the **B.S.A.A. (Bioterrorism Security Assessment Alliance)**, Blue Umbrella is pleased to announce that its newest **'Awakening' series of anti-viral agents** has successfully transitioned into mass production. This next generation of medical countermeasures is designed to provide rapid response and protection against emerging biological contingencies.

This reconciliation act represents more than a change in operations; it is a fundamental shift in philosophy. The organization is moving away from the paradigms of the past to embrace a new, singular objective:

"Our business is no longer life—our business is the **preservation** of it."
